Death Valley, CA.

...Hottest/Lowest Places

Himalayas/Nepal

...Coldest/Highest Places

Anytown, U.S.A.

...To Your Home!

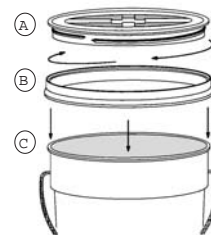

Transform your bucket into an easy opening, airtight, pest-proof storage container with the universal Gamma Seal Lid. When attached to virtually any 12" diameter bucket (3.5- to 7.0 gallon), the Gamma Seal lid provides airtight protection for the contents---excellent for literally thousands of storage applications. The resilient elastomeric gaskets keep air and contaminants out, while protecting the contents.

Stackability is also a handy feature! The Gamma Seal lid is available in a wide variety of standard and food-grade colors for safe storage.

EASY ASSEMBLY

The Gamma Seal lid is a two piece sealing system comprised of 1) a universal adapter ring, and 2) a threaded replacement lid. To assemble, snap the adapter ring (B) to any 12" diameter bucket (C). Then, spin on the heavy duty gasketed lid (A) for an easy to "open/close" airtight fit. It's Easy!!
