

HOW TO MAKE A STANDARD CONNECTION

MAKING A GOOD CONNECTION

To make a connection, the tube is simply pushed in by hand; the unique patented John Guest collet locking system then holds the tube firmly in place without deforming it or restricting flow.

CUT THE TUBE SQUARE

Cut the tube square and remove burrs and sharp edges. Ensure that the outside diameter is free from score marks. For soft or thin-walled plastic tubing we recommend the use of a tube insert.

PUSH UP TO TUBE STOP

Push the tube into the fitting and up to the tube stop.

PULL TO CHECK SECURE

Pull on the tube to check that it is secure. Test the system before use.

TO DISCONNECT

Push in collet and remove tube. To disconnect, ensure that the system is depressurized, push the collet square against the fitting. With the collet held in this position the tube can be removed.

SERVICE & REPAIR KIT Black Polypropylene

PART NO.

SIZE OD

KIT-ISRKE 1/4", 3/8" & 1/2"

101 Total fittings in kit to include Elbows, Tees, Unions/Reducing Unions, Male/Female Connectors, Stem Adapters, Reducing Unions, Fixed/Plug in Elbows, Tube Cutter.

APPLIANCE SERVICE & REPAIR KIT

PART NO.

SIZE OD

KIT-ISRKA 1/4", 5/16", 3/8", 1/2"

86 Total fittings in kit to include Unions, Elbows, Reducing Unions/Elbows, Plugs, Faucet Connectors, Female Connectors, Female/Straight/Swivel/Check Valves/Angle Stop Valves, Tube Cutter.
