

# PUSHLOCK VALVES

The one and done solution that fits your need in any micro valve situation

Introducing the new Push-Lock Valve from Banjo. Made with corrosion resistant polypropylene material and viton seals for a wide variety of chemical compatibilities.

Used in a variety of chemical and non-chemical applications, the Push-Lock Valves are a popular choice among top industrial engineers and end users because the push lock valves provide a permanent leak proof connection for linking plastic tubing to soft metals and drastically reducing installation time.

Available in three popular sizes

- 1/4" - LVPL025V
- 3/8" - LVPL038V
- 1/2" - LVPL050V
