Ultra-Sidewinder, Medium

Specifications

2, 1833
3

System: 33 x 9³/₄ x 1³/₈ (838 x 248 x 35) Dimensions In. (mm) Extension: 141/8 x 93/4 x 13/8 (358 x 248 x 35)

System with endcaps: 6.0 (2.7) Weight

Extension: 2.0 (0.9)

Load Capacity 260 lbs./in2 (18.3 kg./cm2)

Load Capacity per axle: 13,500 lbs. (6,123 kg.)

Injection-molded acrylonitrile butadiene styrene Construction (ABS) plastic and injection-molded Santoprene™

vulcanized rubber tabs

Internal channel opening 3"W x 3/4"H (76mm x 19mm)

Operating Temp. -40°F to 120°F (-40°C to 49°C)

Systems include two (2) end caps. Extensions can be added for increased system length (end caps are not included with extensions). Segments can be removed to create custom lengths.

Modular design allows for easy reconfiguration or repair, even with the cable or cord in place.

Unit is designed for office and light-industrial use and is designed to be run on flat, stable surfaces. Not intended to span gaps, holes or trenches with any weight load.

The system is capable of withstanding loads from vehicles with pneumatic tires but not designed to be run over by any equipment or vehicle with rigid wheels.
